

# Finally, Healthcare Data That Does Its Job

**Unified Foundation. Real-Time Decisions. No More Guesswork.**

Healthcare data is everywhere. Insight isn't. WellStack fixes that. We unify your data at the foundation—then deliver what your teams need to act.

**Fast. Clear. Real-time.**

## Proven Results Speak For Themselves

↑ **12-15%**  
increase in care gap closure

↑ **70%**  
faster onboarding of data sources

↑ **\$3-5M**  
recovered revenue via real-time denial correction

↑ **5-7%**  
improvement in HCC capture = \$10-15M ROI

## Built to Fit Your Environment

- 🔗 AI-powered integration studio for multi-source ingestion
- 🔗 Unified Data Model for longitudinal Patient 360s
- 🔗 Built-in governance, validation, and compliance (HIPAA, HITRUST)
- 🔗 Outputs to FHIR, APIs, HEDIS, CCDA, analytics tools
- 🔗 Low-code cohort and metric design for business users
- 🔗 Pre-built EMR, HIE, CRM, and claims connectors
- 🔗 Cloud-agnostic: Azure, AWS, Snowflake, GCP
- 🔗 Self-service tooling for analysts and data scientists

**With modular Decision Hubs, AI-powered transformation tools, and a cloud-agnostic platform, WellStack is built for outcomes—not just analytics.**

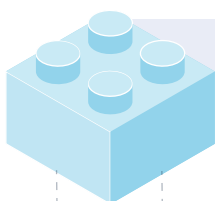

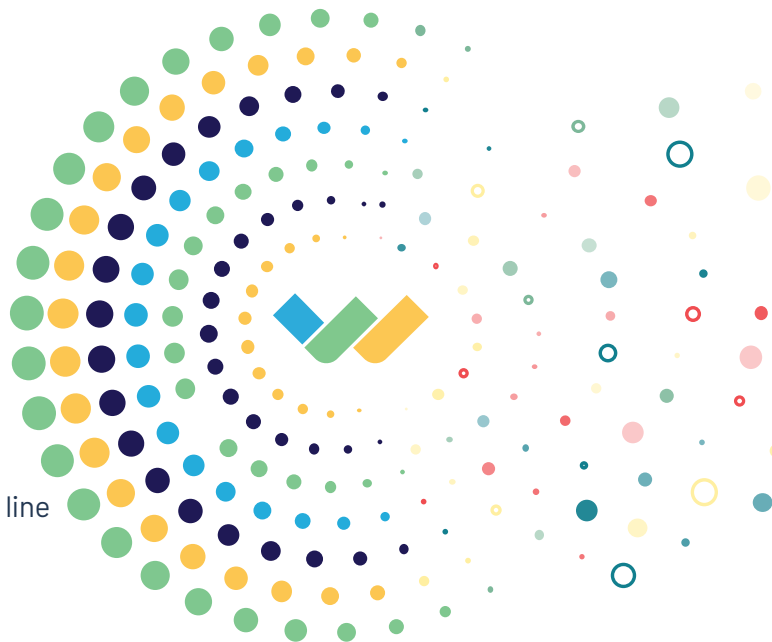

# Decision Hubs

TOOLS FOR THE PEOPLE WHO MAKE HEALTHCARE WORK

WellStack accelerates your path to insight—so you can spend less time waiting and more time acting.

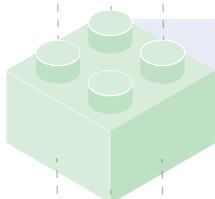

Decision Hubs deliver precision insight and show what to do next.

## Financial RCM Hub

Reveal the revenue you're missing.

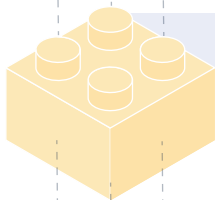

- ✓ Identify denial patterns and root causes
- ✓ Distill underpayments by payer and service line
- ✓ Monitor AR metrics in real time

## Population Risk Hub

Prioritize care before risk becomes cost.

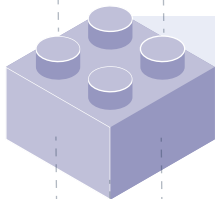

- ✓ Stratify by health risk to spotlight high-need patients
- ✓ Flag rising-risk profiles for timely outreach
- ✓ Examine trends in care access and utilization

## ACO Hub

Align care quality, utilization, and spend—before CMS tells you how you did.

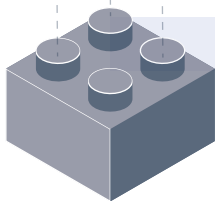

- ✓ Evaluate provider performance on cost, quality & use
- ✓ Analyze overuse, inefficiencies, and leakage
- ✓ Monitor population shifts and patient growth

## Quality Hub

Hit every measure. Flag every issue. Deliver better care.

- ✓ Track HEDIS, STAR, and regulatory benchmarks
- ✓ Monitor safety indicators like infections and readmissions
- ✓ Flag patients missing chronic condition documentation

## Operations Hub

Run operations like a data-driven command center.

- ✓ Real-time visibility with zero operational blind spots
- ✓ Optimize throughput, capacity, and length-of-stay (LOS)
- ✓ Improve access, efficiency, and overall patient flow

## What Our Clients Are Saying

*"You can't act on old data. WellStack's Decision Hub lets us see the full picture in real time - it's self-service, easy to understand and lets us drill down when we need to. That's a game changer."*  
— Terri, Guthrie Clinic

*"When you look at the outcomes Wisconsin has achieved - measurable improvements in quality, cost savings in the billions - it's clear we're doing something different. That difference is the data and it's powered by WellStack"*  
— Gabriel, WCHQ

6x faster implementation  
than legacy platforms

30–40% lower cost  
through automation

<2 weeks to onboard  
new data sources
